staffs, a package of memoranda for the record and other material referred to by General Robert Cushman in his letter to Mr. Houston dated 21 May 1973. I also gave copies of the same material to James Hamilton, Assistant Chief Counsel, Senate Select Committee on Presidential Campaign Activities. I explained to Hamilton that the material was classified since it contained the names of Agency employees involved in sensitive foreign intelligence operations and asked that he not publicly disclose the material without our approval. He will keep the material in a safe custody and asked that we tell him when it can be publicly released. He also said that Cushman will be called to testify later on. The material for Smith also contained a copy of Helms' letter to Houston on the Hoover report.
